details

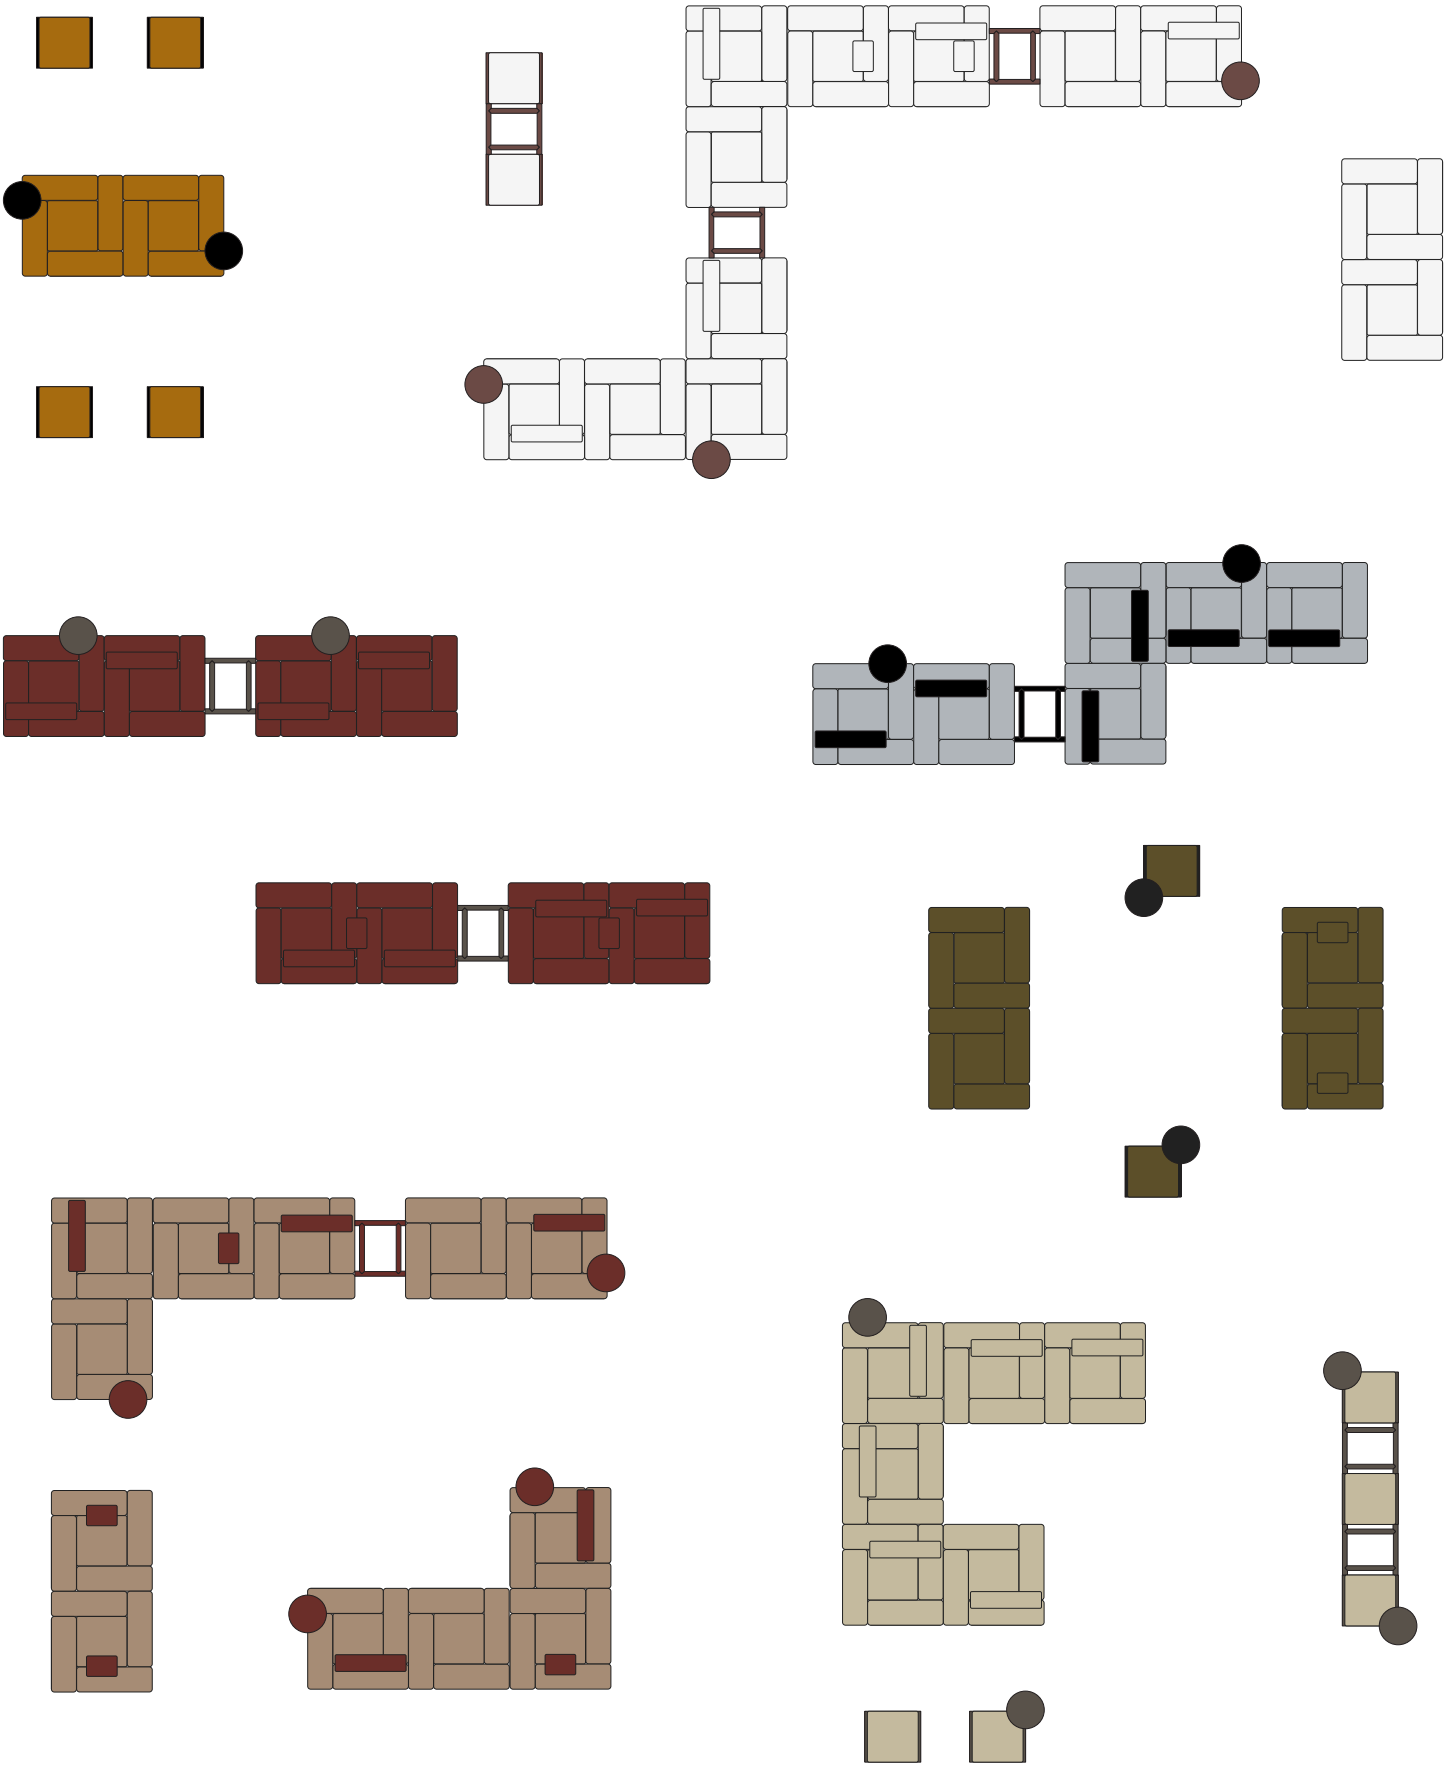

A bayonet fitting system allows you to connect the basic ARPEGGIO modules with padded and upholstered backrests and 30° tilting armrests. A pouf extends the family and can be attached to the sofa frame or used alone. Another way of connecting the modules is by inserting a table in sheet steel. The family is completed by optional features that are fitted to the ends of the frames: a round compact laminate table and USB sockets.

construction

Modular sofa composed of a steel tube frame, with fire-retardant foam seats. The basic module is the main element where, depending on needs, and through bayonet fittings, padded and upholstered backrests, as well as 30° tilting armrests can be added. Extending the family, the pouf is available; it can be attached to the sofa frame or be used on its own. Another accessory is a sheet metal table that connects the modules. The accessory family is completed by optional features that are fitted to the ends of the frames: a round black compact laminate table and USB sockets.

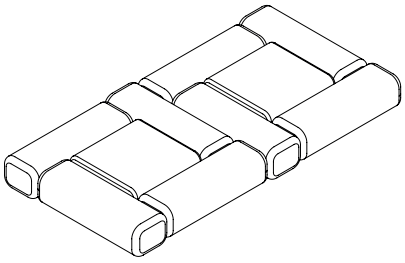

SEAT SUPPORT:

FSC certified plywood panel with wood fiber from sustainably managed forests; steel supports made of 26% recycled material.

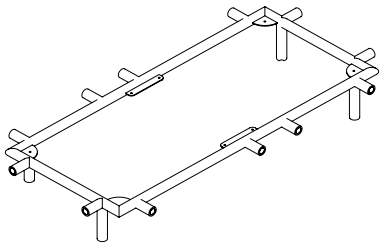

SEAT CUSHION:

T40PCM polyurethane foam padding, certified fireproof in Class 1IM.

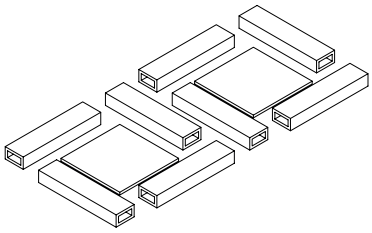

FRAME:

Epoxy powder coated steel frame made up of 57% recycled steel.

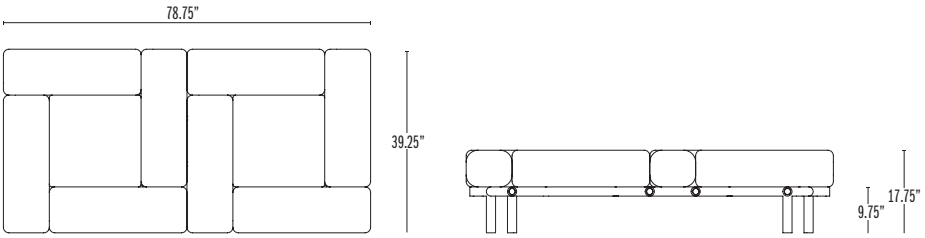

SEAT STRUCTURE:

FSC certified plywood seat panel with wood fibers from sustainably managed forests.
