

Wollsdorf Leather Program

	grade
mammut	11
<hr/>	
<p>Mammut is a high quality top grain leather made from a superior selection of raw hides. This leather has been lightly sanded and precisely plated to achieve a natural grain structure that is very even throughout the hide. A light protective top coat is applied to give ultimate color consistency and yet maintain a very soft hand and luxurious feel.</p>	
finesse	CALL
<hr/>	
<p>Finesse is a high quality full grain leather made from the top 20% of our raw hide selection. This leather has been vacuum pressed to give a beautiful smooth appearance and subtly show the grain structure of a true natural leather. A very light protective top coat is applied to give ultimate color consistency and yet maintain a very soft hand and luxurious feel.</p>	
FOC earth	CALL
<hr/>	
<p>FOC earth is a chrome-free, environmentally friendly leather. A total vertically integrated tanning process ensures the most eco friendly leather possible without sacrificing the high quality of this semi-aniline product.</p>	

- processing: 100% Aniline through dyed, lightly polished and precisely plated to give ultimate yield.
- finish: Color pigmented protective finish
- characteristics: Even coloration throughout all parts of the hide. Ultimate color consistency from hide to hide. Smooth look, soft hand, luxurious feel
- specifications: California Bulletin 117 Boston Fire Department (BFD 1X-1)

care

Dust non-vigorously with a soft piece of cloth every month or so. Capable of being absorbed within a few hours, it is important that any spilling or soiling be wiped with a dry or lightly moistened piece of soft cloth. Use a cleaner only for stubborn spots. Never use saddle soap or ivory soap and water solutions. Never soak the leather with water or any other cleaning agents. Conditioning the leather once or twice a year will restore the leather's natural moisture, preserving its softness and providing protection from dust and liquids.
